## **DETAILED ACTION**

### ***Drawings***

1. The drawings filed on 07/21/04 are acceptable.

### ***Allowable Subject Matter***

2. Claims 1, 2, 4-8, and 11-17 are allowed.
3. The following is an examiner's statement of reasons for allowance: It is agreed that the prior art of record fail to teach or suggest, alone or in combination, the limitations: "a programming unit which effectuates a substantially rising gradient in time of the current over (throughout) a run-up phase of at least an interval from 1 s (0.5 s) (a time) after ignition of the lamp to 3 s (4 s) after ignition of the lamp" in a manner claimed in claims 1, 13, 14 and 17; "wherein the current is controlled such that its amplitude rises during the run-up phase, and wherein the time gradient of the current is chosen such that the luminous flux generated by the lamp achieves at at least to two given moments in time assigned minimum values" as claimed in claim 11; and "wherein the run-up phase comprises at least the interval from 1 s after ignition of the lamp to 3 s after ignition of the lamp, and wherein the programming unit effectuates a substantially rising gradient in time of the current during the run-up phase to a value of the current corresponding to a maximum current admissible for the lamp" as claimed in claim 16. It is for this reason in combination with all the other limitations in the independent claim 1, that claims 1, 2, 4-8, and 11-17 are allowable over prior art of record.

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
